-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The opening of claim 3 has no antecedent basis. In claim 5, the aperture has no antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
4. Claims 1, 2 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/76977 A1. A hair colorant applicator is disclosed including a container 10 containing a first part of a two part hair colorant, a subcontainer 20 containing a second part of the two part hair colorant and suspended into the first part of the two part hair colorant and an assembly 40 arranged to selectively rupture the subcontainer in order to mix the first part and the second part of the two part hair colorant, see figures 5 and 6.
As to claim 2, the subcontainer 20 is suspended from a rim of the container 10 by collar 30 and the applicator further includes a cap 50 covering the opening and a forcing member 45

arranged to transfer rupturing force to the lower portion of the subcontainer from the cap in use, thereby releasing the second part into the first part.

As to claim 5, the container is deformable, note formation 15 of figure 2, so that in use a desired quantity of hair colorant may be forced through the aperture in the cap.

As to claim 6, the forcing member includes a tubular body formed by annular plug seal 45.

As to claim 7, a rim defined by the lower edge of tubular body 45 abuts a ledge 33 protruding from an inside wall of the lower portion of the subcontainer.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01/76977 A1 as applied to claim 2 above, and further in view of Licari et al (Pub No. US 2005/0072442 A1). The difference between the claimed subject matter and WO 01/76977 A1 resides in a sponge affixed to the cap for applying the hair colorant and arranged to communicate with the interior of the container by means of an aperture formed in the cap. Licari et al figure 7 teaches that it is well known in the art to provide a cap with a sponge. It would have been obvious to one of

ordinary skill in the art to modify the cap by providing a sponge as suggested by Licari et al, in order to provide an applicator for applying the hair colorant.

Allowable Subject Matter

8. Claims 4, 8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David T. Fidei whose telephone number is (571) 272-4553. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 2724562. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
